

Hello, my name is Steve Wolinsky and I am the president of TSCC 1722, the Ultima Towers north. Our building is 36 floors with 384 suites and there is a twin tower to the south. We recently completed a full refurbishment of our corridors for both the north and south towers. This included painting, wallpaper, carpet, tiles, refinishing the doors, new signs and electric fixtures.

The work was done by KayCondo GC and the design was done by Shields and Associates as a design /build project.

This was a complex project and we are thrilled with the results. Lisa Kay and Vitorhya Shields with their teams were very professional to work with and delivered on all the aspects of the design and project. They were on time and on budget with minimum disturbance to the residents. Regular meetings were held to work through the project and make quick decisions as needed.

I would highly recommend both KayCondo GC and Shields and Associates if you are looking to do a refurbishment project in your building or condo.

Steve Wolinsky

President TSCC1722, Ultima Towers North
